STATEMENT CONFIRMATION

To whom it may concern,

We, hereby confirm that our WalcoRen Rennet Products, 95L300; 97P100; 97TP100; 90PD150; 80PP150; 80PS150 complies with the following:

- are exclusively sourced from stomachs origin like e.g. Canada, New-Zealand and Australia.
- According to Canadian legislation Natural Rennet and Rennet in generally is not defined as food additive, but as **PROCESSING AID** for alimentary food stuff production in conformity to the Canadian Regulation on organic production system and permitted Substances lists (CAN/CGSB 32.310-2006 and CAN/CGSB 32.311-2006).
- WalcoRen certifies the absence of any GMO nor any kind of gluten substances in the products and al in the extraction process to the final product.
- All stomachs delivered to WalcoRen are furnished with veterinarian certificates and certificates of origin.
- WalcoRen Rennet is only produced in single-batch-system which guaranties that each kg or liter of rennet can be traced back at any time to the slaughterhouse where the stomachs came from.
- WalcoRen is also controlled and certificated by ECOCERT Canada which means that the origin of all raw materials used for the production of WalcoRen Natural Rennet is also traced and controlled – year by year – the approval number is : 127441 ECOCERT.
- WalcoRen only uses clean sterilised water and table salt in order to extract and produce the final product. The table salt contains only pure salt and anti-caking agent. No other additives nor preservatives of any kind are present in the process.
- WalcoRen certifies that there is no ionization radiation from the process of extraction to the finished product.
- We, hereby confirm that the WalcoRen Rennet range of products, as a food processing-aid (Cheesemaking), is not hazardous of any kind. Even if not correctly stored in a cold room or a refrigerator between 2 to 8°C, it will not affect other products, nor be harmful to human handling.
